

WILMS

Women's Interest-Free Loan Management System

Roadmap — Future Work — v1.8.0

WILMS Future Work — Roadmap Book

Version: 1.7.3 Classification: Confidential

1. Current state

Platform feature development completed at v1.7.2. Release v1.7.3 delivers the official documentation library and removes standalone Export Center in favour of contextual exports.

2. v1.8 — Integrations and payments

Target: Q4 2026

Item	Description	Priority
------	-------------	----------

--	--	--

Mobile money integration	MTN MoMo, Vodafone Cash payment recording	High
--------------------------	---	------

Bank statement import	CSV/OFX import for reconciliation	High
-----------------------	-----------------------------------	------

Webhook infrastructure	External system event receivers	Medium
------------------------	---------------------------------	--------

OpenAPI specification	Auto-generated from domain routes	Medium
-----------------------	-----------------------------------	--------

Payment provider sandbox	Test environment for integrations	Medium
--------------------------	-----------------------------------	--------

3. v1.9 — Enterprise automation

Target: Q1 2027

Item	Description	Priority
------	-------------	----------

--	--	--

Workflow automation rules	Configurable if/then business rules	High
---------------------------	-------------------------------------	------

Scheduled report delivery	Email reports on cron schedule	High
---------------------------	--------------------------------	------

Advanced notification routing	Role/condition-based routing	Medium
-------------------------------	------------------------------	--------

Bulk import/export tooling	CSV borrower/loan import	Medium
----------------------------	--------------------------	--------

Expense budget limits	Configurable spending caps	Low
-----------------------	----------------------------	-----

4. v2.0 — General ledger and multi-branch

Target: Q2 2027

Item	Description	Priority
------	-------------	----------

--	--	--

Statutory double-entry GL	Full chart of accounts	High
---------------------------	------------------------	------

Multi-organisation tenancy	Isolated org data	High
----------------------------	-------------------	------

Branch-level pool isolation	Per-branch capital pools	High
-----------------------------	--------------------------	------

Inter-branch transfers	Audited capital movement	Medium
------------------------	--------------------------	--------

SSO / SAML integration	Enterprise identity provider	Medium
------------------------	------------------------------	--------

5. v2.5 — Borrower engagement

Target: Q4 2027

Item	Description	Priority
------	-------------	----------

--	--	--

Borrower SMS reminders	Payment due notifications	High
------------------------	---------------------------	------

Payment reminder automation	Schedule-based reminders	Medium
-----------------------------	--------------------------	--------

Borrower status portal	Read-only borrower self-service	Low
------------------------	---------------------------------	-----

6. v3.0 — Platform scale

Target: 2028

Item	Description	Priority
------	-------------	----------

--	--	--

Multi-region deployment	Geographic redundancy	High
-------------------------	-----------------------	------

ML risk scoring	Predictive default indicators	Medium
-----------------	-------------------------------	--------

Localized UI	Twi, Ga, Ewe language support	Medium
--------------	-------------------------------	--------

Partner API marketplace	Third-party integration ecosystem	Low
-------------------------	-----------------------------------	-----

Native mobile app	iOS/Android if PWA insufficient	Low
-------------------	---------------------------------	-----

7. Deferred items with rationale

Item	Deferred to	Rationale
------	-------------	-----------

--	--	--

Borrower portal	v2.5	HQ-operated model sufficient
-----------------	------	------------------------------

Multi-org tenancy	v2.0	Single-org deployment meets current partners
-------------------	------	--

Statutory GL	v2.0	Pool ledger meets programme needs
--------------	------	-----------------------------------

| Native mobile | v3.0 | PWA + field shell adequate |

| Redis job queue | v1.9 | Vercel Cron sufficient at scale |

| Standalone Export Center | Removed v1.7.3 | Contextual exports reduce duplication |

| Full shadcn migration | Ongoing | Incremental per route |

| WCAG full audit | Ongoing | Remediations per QA unit |

| Localized guides | v2.x | English first |

8. Documentation roadmap

| Item | Version | Status |

|-----|-----|-----|

| Official documentation library | v1.7.3 | Complete |

| Static docs web portal | v1.8 | Planned |

| Interactive API explorer | v1.8 | Planned |

| Video walkthroughs | v1.9 | Planned |

| Localized manuals | v2.x | Planned |
