

WILMS

Women's Interest-Free Loan Management System

Reporting & Analytics Book — v1.7.3

WILMS Reporting & Analytics Book

Version: 1.7.3 Classification: Confidential

1. Overview

WILMS provides operational reports, executive intelligence, forecasting, and contextual export capabilities for programme oversight and board presentation.

2. Report types

| Report | Description | Primary audience |

|-----|-----|-----|

| Portfolio summary | Active loans, disbursed, collected, outstanding | Admin, Auditor |

| Collection performance | Weekly/monthly collection rates | Admin, Director |

| Overdue analysis | Past-due loans by age bucket | Admin, Approver |

| Disbursement register | All disbursements in period | Admin, Auditor |

| Expense summary | Expenses by category and status | Admin, Finance |

| Reconciliation status | Open and resolved reconciliations | Admin |

| Borrower register | Full borrower listing | Admin, Auditor |

| Group performance | Collection rates by group | Admin, Collector lead |

3. Executive intelligence

Available at /executive for admin and authorized roles.

KPI categories

Financial: Total disbursed, collected, outstanding, pool utilisation, expense totals.

Operational: Active borrowers, collection rate, groups served, collector count.

Risk: Flagged borrowers, overdue count, reconciliation aging, forecast variance.

Forecasting

Schedule-based projection with configurable horizon (default 28 days). Projects expected collections based on active loan schedules.

Portfolio breakdown

Dimensions: district, community, group. Drill-down from summary to detail.

Compliance pack

One-click export of KPI summary, portfolio snapshot, and audit sample for external review.

4. Export capabilities

v1.7.3: Contextual exports (primary pattern)

Export initiated from the page displaying source data:

| Source | Formats |

|-----|-----|

| Report results | PDF, Excel, CSV, Print |

| Borrower profile | PDF, Print |

| Executive intelligence | PDF compliance pack |

| Reconciliation summary | PDF, Excel |

Export engines

Located in apps/frontend/src/features/export/:

- PDF — jsPDF with branded cover page (#0F6E56)
- Excel — ExcelJS workbooks
- CSV — Standard comma-separated
- Print — iframe-based, no popup blockers
- DOCX — Word documents via docx library

All exports include confidentiality footer.

Export job API (retained)

POST/GET /exports/jobs for programmatic export tracking. Used by embedded flows. Standalone Export Center UI removed v1.7.3.

5. Dashboard analytics

Operational dashboard

Reconciliation aging, pending table, Recent Activity feed, collection metrics. Task-oriented for daily operations.

SQL aggregation

Dashboard KPIs prefer SQL aggregates over client-side computation. Fail-closed on oversized unpaginated report requests (422).

6. Analytics events

Analytics module tracks user interaction events for product improvement. No external APM vendor in production.

7. Best practices

- Run portfolio summary before board meetings
- Export compliance pack monthly for records
- Use forecast for cash flow planning
- Filter reports by district/community for regional reviews

CONFIDENTIAL — For authorized WILMS personnel, executive review, procurement, and official record keeping only.
